

Union Terminal Imports

Fine Brass Models
<http://www.union-terminal-imports.com>

Coming soon – more info. We will be doing the SP DH643. We will be producing all three prototypes in each of the three road numbers they carried during their time on the SP. They will each come with appropriate modifications for the road number. We will also offer a special limited edition set of the three units as delivered with either a NYC or SP dynamometer car. We are still researching which dynamometer we can get the most information on.
